Here is the witch from *Hansel and Gretel*. Can you colour her in?

These notes support a Key Stage 1 lesson introducing the fairytale genre, using the *Fairytale Fiasco* series as a springboard for the activities in this pack. Warm up with familiar stories, explore characters and places, then create new versions of classic fairytales.

## Introducing the genre

Before handing out the worksheets, read one *Fairytale Fiasco* title aloud and ask the class to spot the familiar fairytale underneath the silly new twist. What's the same? What's different? This helps children see that a story can change its details and still be recognisably the same tale. That's the idea behind every activity in this pack.

## Discussion questions

- What usually happens at the start of a fairytale?
- Can you think of a fairytale with magic in it? What kind of animals do you find?
- Do fairytales take place now or long ago? How do they usually end?
- If you could change something in a fairytale, what would it be?

## Using this pack

Pages 1, 2 and 3 work well as a whole-class warm-up before the fix-up activities on pages 4 and 5, which children can complete individually or in groups. Page 1's quiz can be read aloud and answered together, and page 3's map is a nice chance for children to invent a fairytale place of their own. Encourage children to say their idea aloud before writing it down. The goal is playful, confident storytelling rather than "correct" answers.

## Extension ideas

- Ask children to act out their fixed-up fairytale in small groups.
- Turn the completed worksheets into a class "Fairytale Fiasco" display.
- Invite children to retell their new version and compare ideas.
